Peptide Therapy for Anti-Aging & Metabolic Improvement

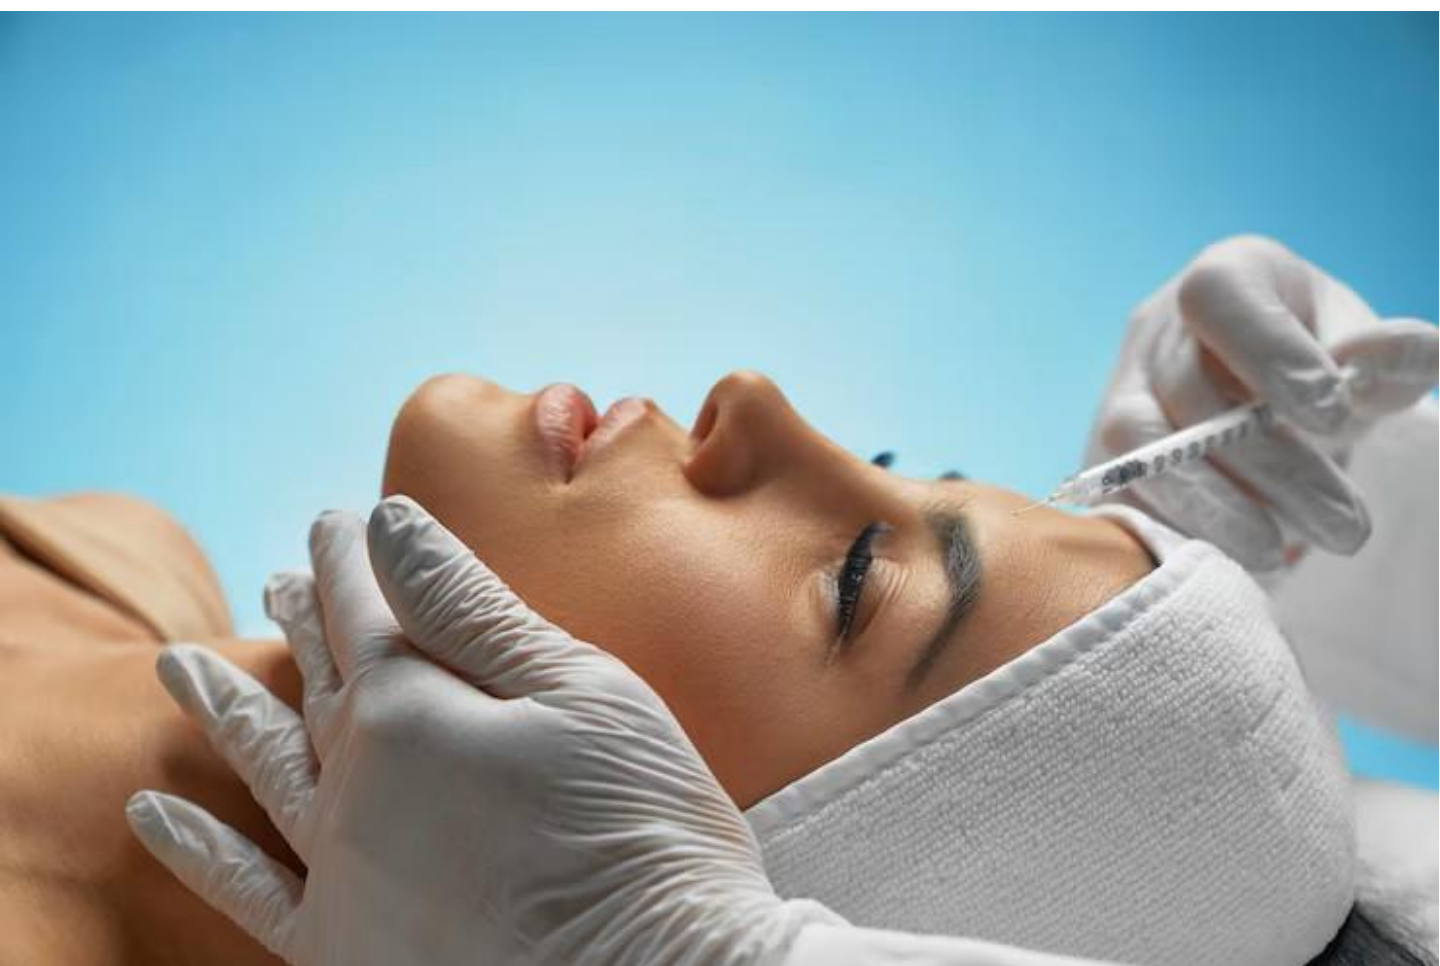

PRP & Exosome Therapy for Skin & Body

High-Grade IV Nutrition Therapy

Reproductive Health Assessment Packages

Aesthetic Medicine

Enhance natural beauty with treatments for skin rejuvenation, tightening, and facial contouring.

Aesthetic Medicine

BENEFITS

- To leverage cutting-edge technologies to achieve superior skin rejuvenation, tightening, and facial contouring. These sophisticated solutions provide precise, natural enhancements, ensuring optimal aesthetic outcomes through highly specialized, modern approaches tailored to individual beauty goals.

TREATMENT CATEGORIES

1. Mesotherapy

P / session
EXOSOMES (From 5 sessions or more) (P / session)
EXOSOMES (From 10 sessions or more) (P / session)
PDRN (Polydeoxyribonucleotide) + FGF (Face) (From 5 sessions or more) (P / session)
PDRN + FGF (Face) (From 10 sessions or more) (P / session)
PDRN + FGF (Face) P / session
NCTF (Face) (From 5 sessions or more) (P / session)
NCTF (Face) (From 10 sessions or more) (P / session)
PDRN + FGF (Eyes) (From 5 sessions or more) (P / session)
PDRN + FGF (Eyes) (From 10 sessions or more) (P / session)
NCTF (New Cellular Treatment Factor) (Eyes) P / session
NCTF (Eyes) (From 5 sessions or more) (P / session)
NCTF (Eyes) (From 10 sessions or more) (P / session)
PRP P / session
PRP (From 5 sessions or more) (P / session)
PRP (From 10 sessions or more) (P / session)
RADIANCE P / session
RADIANCE (From 5 sessions or more) (P / session)
RADIANCE (From 10 sessions or more) (P / session)

Aesthetic Medicine

2. EBD (Skin Tightening with Energy-Based Devices)

Face
Package of 2 sessions (P / session)
Eyes
Package of 2 sessions (P / session)
Thermage FLX Combo F + E (Face + Eyes)
Package of 2 sessions (P / session)
Body
Package of 2 sessions (P / session)
Ultherapy P / 1 line
Over 1000 lines (P / 1 line)

3. Aesthetic Injectables

Ha filler - face / neck / hands p / 1cc
2 - 4cc (p / 1cc)
5CC or more (P / 1CC)
Ha filler - body (50 - 200cc) (p / 1cc)
200 - 500cc (p / 1cc)
Fat Filler P / 1 Area
Fat Filler (2 - 4 areas) (P / area)
Fat Filler (More than 4 areas) (P / area)
Botox P / 1 unit
Botox (100 - 200 units) (P / 1 unit)
Botox (More than 200 units) (P / 1 unit)

Aesthetic Medicine

4. Laser & Skin Treatments

PICOWAY - Full face P / session
From 5 sessions or more (P / session)
From 10 sessions or more (P / session)
PICOWAY - Tattoo (P / area based on size)
PICOWAY - Freckles (P / spot)
From 5 spots or more (P / spot)
From 10 spots or more (P / spot)
Laser CO ₂ P / area
20 - 40 spots (1 area)
More than 40 spots (2 areas)

5. Thread Lifting

Collagen Thread Lifting P / Area
Thread Lifting - Face / Neck (2 - 3 areas) (P / area)
Thread Lifting - Face / Neck (More than 4 areas)
Thread Lifting - Nose (Full nose)
Thread Lifting - Nose (From 2 sessions or more) (P / session)
Nose pillar

Reproductive Health Assessment Packages for Men and Women

*Hormone and fertility testing to diagnose infertility
and support reproductive health*

Reproductive Health Assessment Packages for Men and Women

BENEFITS

- To utilize advanced diagnostic technologies for precise fertility and hormonal evaluations. These specialized solutions provide in-depth insights into infertility and hormonal imbalances, ensuring tailored care for optimal reproductive health through modern medical advancements

TREATMENT CATEGORIES

- Assessment of sex hormone function
- Detection of reproductive abnormalities, infertility, subfertility
- Identification of causes of low libido, erectile dysfunction
- Support for diagnosing precocious or delayed puberty in male/female children

Through testing Estradiol, FSH, LH, AMH, Testosterone, Prolactin, Progesterone, semen analysis, etc.

Joint Health Treatment

Regenerative therapies to relieve joint pain, improve mobility, and treat osteoarthritis and injuries.

Joint Health Treatment

BENEFITS

- Employing next-generation regenerative technologies, our joint services offer precise solutions for pain relief and mobility restoration. These advanced therapies target osteoarthritis and injuries with unparalleled accuracy, delivering specialized care to enhance joint function and patient quality of life.

TREATMENT CATEGORIES

Package Name	Target Group	Included Services
Basic Package – Single Stem Cell Injection	Mild joint pain, tendonitis, synovitis	Consultation, X-ray or joint ultrasound, 1 injection, care instructions
Advanced Package – Joint Regeneration Support	Grade II–III osteoarthritis, limited mobility	Consultation, MRI, 2–3 injections, 5 physical therapy sessions, follow-up
Premium Package – Intensive Regeneration	Severe osteoarthritis, post-surgery recovery, complex injuries	Multidisciplinary consultation, MRI, 3–5 injections, 10 physical therapy sessions, 3-month follow-up
Athlete Package – Injury Recovery	Athletes, sports players with tendon, muscle, or joint injuries	In-depth consultation, MRI/ultrasound, stem cell injection, PRP, 7–10 physical therapy sessions, recovery monitoring

Joint Health Treatment

Package Name	Target Group	Included Services
Joint Lubrication Package – Single HA Injection	Grade I–II osteoarthritis, joint fluid deficiency	Consultation, joint X-ray, 1 HA injection, post-injection follow-up
Combined Stem Cell + HA Package	Grade II knee/shoulder osteoarthritis	Consultation, joint X-ray, 1 stem cell injection, 1 HA injection, recovery exercises
3-in-1 Regeneration Package – Stem Cell + HA + PRP	Severe osteoarthritis, comprehensive recovery	Consultation, joint X-ray, stem cell, HA, PRP injections, 5 physical therapy sessions, mobility testing
Spinal Recovery Package – Stem Cell	Cervical/lumbar degeneration, mild disc herniation	Consultation, spinal X-ray, stem cell injection in spinal area, physical therapy
Advanced Spinal Package – Stem Cell + PRP	Disc herniation, sciatica, recurrent pain	C-arm guided stem cell injection, PRP, spinal MRI, 10 physical therapy sessions, clinical monitoring

Peptide Therapy for Anti-Aging & Metabolic Improvement

Peptide treatments to slow aging, boost metabolism, and enhance vitality.

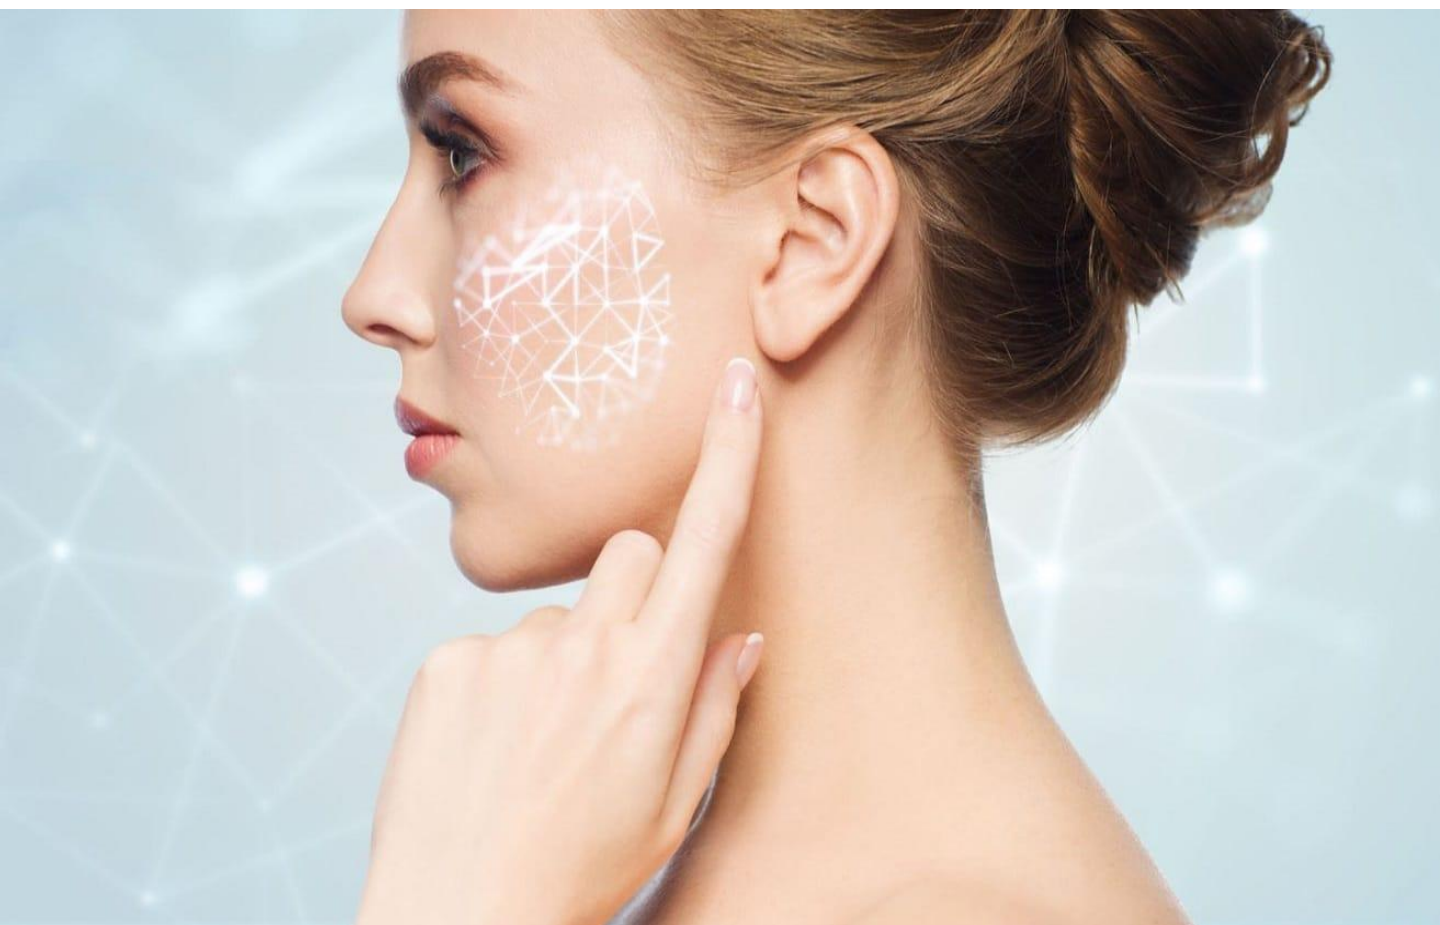

Peptide Therapy for Anti-Aging & Metabolic Improvement

BENEFITS

- To utilize cutting-edge biotechnologies to combat aging and enhance metabolic function. These advanced treatments deliver precise cellular rejuvenation and vitality enhancement, offering specialized solutions for long-term health and optimal physiological performance through modern science.

TREATMENT CATEGORIES

Product	Main Benefits	Recommended Protocol	Dosage	Frequency
Epitalon	Telomere elongation, cellular anti-aging	Subcutaneous / IV injection	5mg x 10 vials / month	Daily for 10 days/month
BPC-157	Gut repair, inflammation reduction	Subcutaneous injection	250mcg/day x 30 days	Daily for 30 days
GHK-Cu (Copper Peptide)	Skin regeneration, collagen production	Subcutaneous injection	5mg x 10 vials / month	Twice weekly for 3 months
Thymosin Alpha-1	Immune enhancement, improved resistance	Subcutaneous injection	1.6mg x 10 vials / month	Twice weekly for 3 months

PRP & Exosome Therapy for Skin & Body

*Next-generation regenerative treatments for
superior skin renewal and joint recovery.*

PRP & Exosome Therapy for Skin & Body

BENEFITS

- Leveraging state-of-the-art regenerative technologies, our PRP and exosome therapies provide superior skin rejuvenation and body recovery. These highly specialized treatments ensure precise tissue repair and collagen enhancement, delivering advanced solutions for aesthetic and functional restoration.

TREATMENT CATEGORIES

Therapy	Benefits	Number of Sessions	Frequency
Autologous PRP combined with HA & Peptide	Skin rejuvenation, improved elasticity	3 sessions/month x 3 months (9 sessions)	Every 10 days
Exosome combined with PRP	Cellular regeneration, collagen synthesis	2 sessions/month x 3 months (6 sessions)	Every 15 days
PRP joint injection (for athletes, joint aging)	Cartilage repair, joint pain relief	1 session/month x 3 months (3 sessions)	Every 30 days

High-Grade IV Nutrition Therapy

Sophisticated IV therapies for modern detoxification, skin vitality, and energy boost.

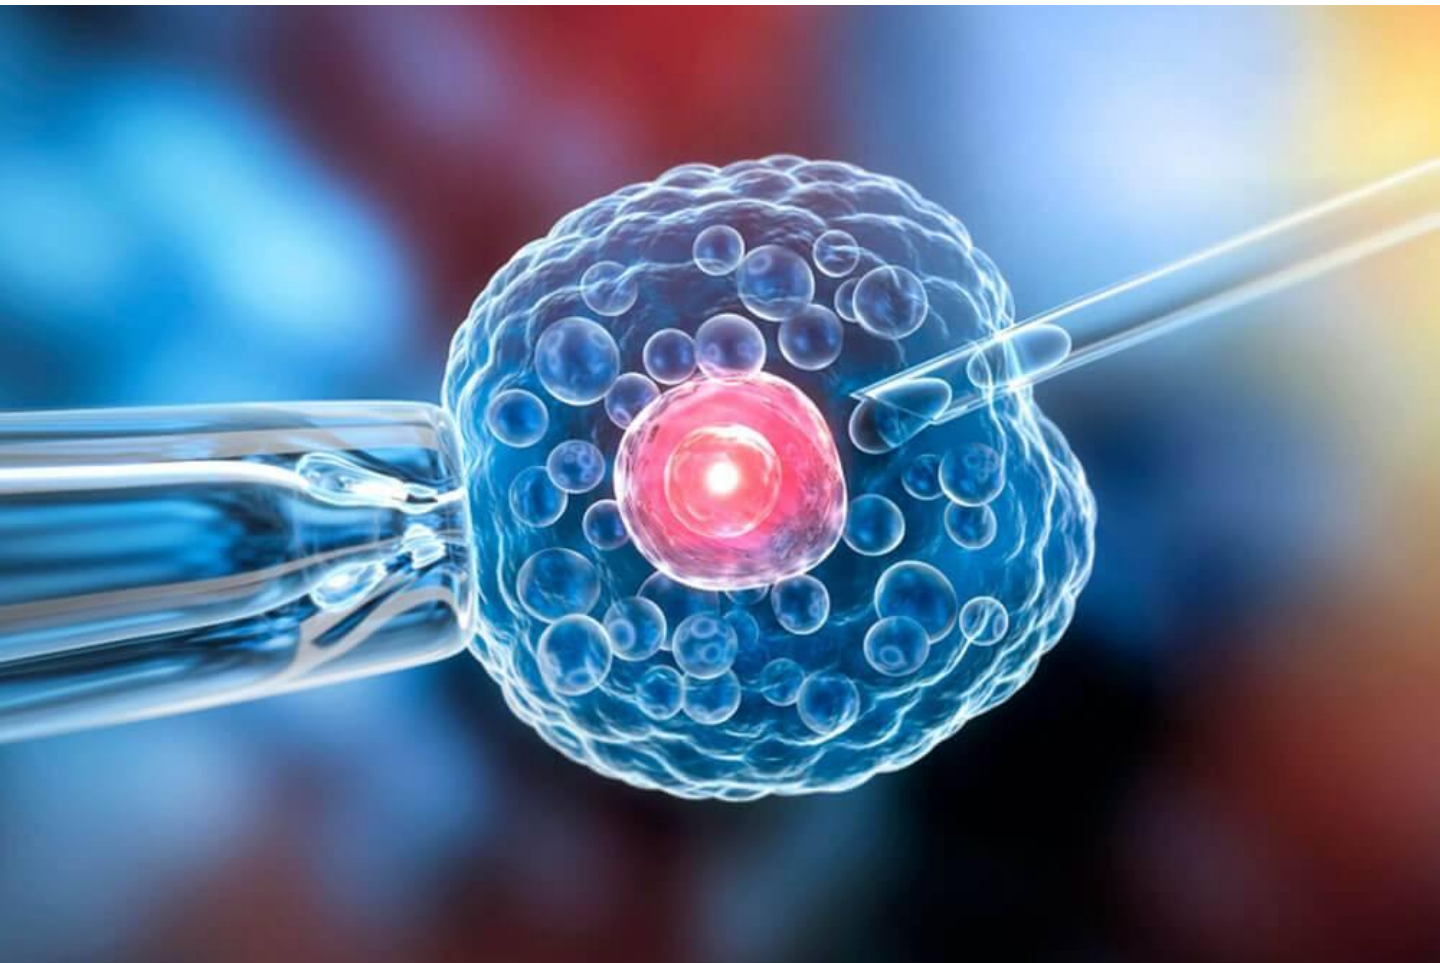

High-Grade IV Nutrition Therapy

BENEFITS

- Employing sophisticated technologies for modern detoxification, skin vitality, and energy enhancement. These advanced treatments deliver precise nutrient infusion, ensuring specialized care for improved stamina and radiant health through cutting-edge therapeutic approaches.

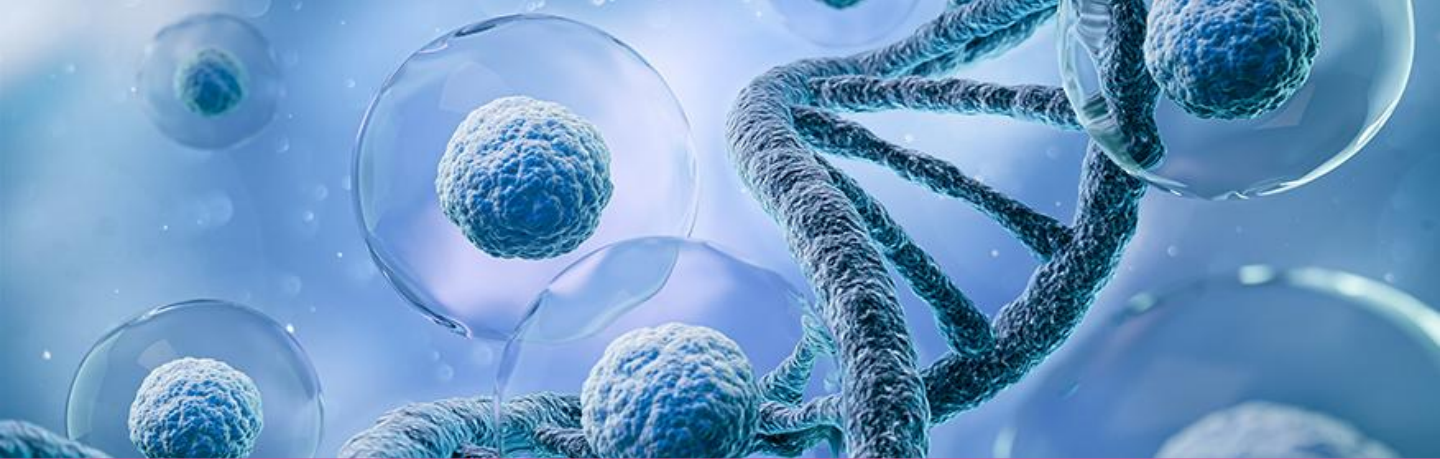

TREATMENT CATEGORIES

Therapy	Benefits	Main Components	Number of Sessions
Skin Brightening & Anti-aging IV Drip	Skin brightening, anti-aging	Glutathione + Vitamin C + ALA	4 sessions/month x 3 months (12 sessions)
Detox IV Therapy	Heavy metal removal, liver/kidney improvement	EDTA + Vitamin B + NAC	2 sessions/month x 3 months (6 sessions)
Performance Recovery IV Drip	Improved stamina, endurance	L-Carnitine + Magnesium + Amino Acid	2 sessions/month x 3 months (6 sessions)

Personalized and Regenerative Medicine Packages

*Innovative diagnostics for comprehensive
cancer, cardiovascular, and anti-aging
health optimization.*

Personalized and Regenerative Medicine Packages

BENEFITS

- Our innovative diagnostic packages harness groundbreaking technologies for comprehensive health optimization. By focusing on cancer, cardiovascular, and anti-aging prevention, these highly specialized solutions provide in-depth insights, ensuring personalized care for sustainable wellness and disease mitigation.

TREATMENT CATEGORIES

Test Package	Description & Benefits
1. "HEALTHY SKIN – NO INFLAMMATION – NO AGING" (In-depth skin microbiome & physiology analysis)	
Skin microbiome analysis	Detects bacteria, yeast, and ecological imbalances
Skin pH & barrier measurement	Assesses barrier damage and irritation risk
Skin inflammation assessment	Quantifies inflammatory cytokines, oxidative stress markers

Personalized and Regenerative Medicine Packages

Test Package	Description & Benefits
2. "HEART WITHOUT STROKE" (Personalized cardiovascular & stroke risk screening)	
Lipid profile (LDL, HDL, Triglyceride)	Detects harmful lipids causing vascular occlusion
hs-CRP & Homocysteine test	Assesses vascular inflammation and latent stroke risk
Cardiovascular risk gene test	Identifies genetic mutations affecting blood vessels & heart
3. "HORMONES & WHOLE-BODY VITALITY" (Endocrine & metabolic assessment for sustainable health)	
Male/Female hormone test	Evaluates Estrogen, Testosterone, Progesterone
Insulin resistance & HbA1c test	Detects early diabetes risk, poor metabolism
Liver, kidney function test	Screens for metabolic disorders causing toxin accumulation
4. "YOUTHFUL BODY – EXCLUSIVE SERVICE FOR THE ELITE" (DNA & gut microbiome decoding for optimal health)	
Nutritional & disease DNA decoding	Identifies disease risks, suitable diet
Gut microbiome test	Evaluates digestive health, poor absorption, irritable bowel syndrome
Oxidative stress & systemic inflammation assessment	Predicts aging, chronic inflammation
5. "CANCER STRIKES SUDDENLY – DON'T WAIT FOR LATE DETECTION" (Advanced Solution gene-based cancer screening)	
Comprehensive cancer screening (50 cancer types)	Assesses genetic risk for 50 common cancers
Breast & ovarian cancer screening (female)	Detects BRCA1/2 mutations, high-risk screening
Colorectal, gastric cancer screening	Tests APC, TP53 mutations
Lung, liver, pancreatic cancer screening	Quantifies genetic markers for organ cancer risk

Personalized and Regenerative Medicine Packages

6. "NO MORE JOINT PAIN – DON'T WAIT UNTIL MOBILITY IS HARD" (Early joint disease diagnosis & prevention)	
Autoimmune arthritis test (RF, Anti-CCP, ANA)	Quantifies antibodies causing joint inflammation
Joint degeneration test (COMP, CTX-II)	Assesses cartilage wear level
Uric Acid test (Gout)	Check Uric Acid levels causing gout
Systemic & joint inflammation test (hs-CRP, IL-6)	Evaluates chronic inflammation, joint degeneration risk
Joint degeneration risk gene test	Predicts genetic risk & early degeneration

About P.E.S. RegenMed

P.E.S. RegenMed Co., Ltd. (P.E.S.) is a pioneering company in regenerative medicine, high-quality medical staffing, and medical resort management consulting. We are committed to providing advanced healthcare solutions to enhance service quality in Vietnam and globally.

Cooperated with the latest world-leading technology platforms and professional scientific staff, P.E.S. RegenMed is dedicated to assisting our client with accelerating the precision medicine research and cancer diagnostics. NGS is a critical tool as it provides individual patient the genomic information, which could be used to tailor therapy. P.E.S. RegenMed integrates advanced technologies in NGS, microarray and big data analytics platforms to offer the most in-depth genomics data analysis. These tests are useful in finding genetic variants which assist in understanding, diagnosing and treating human disease. Our goal is to help solve the mysteries of how diseases are induced by genetics and epigenetics, and eventually facilitating the advancement of precision medicine.

Collaborate with us

We provide access to the world's most advanced sequencing facility, no matter how large or small your organization is or where you are located in the world. Our commitment is to provide a simple, seamless experience.

1. Core Products

Our products and services represent the output of our collective experience, providing the highest quality, utility, and reliability to drive genomic discovery.

2. Custom Solutions

Our custom content products and complementary services provide tailored, end-to-end solutions for discovery and clinical research.

3. Deep Scientific Collaborations

Our expertise can be leveraged to build novel tools and technologies to expand the boundaries of what is possible.
